About CoachHub

Founded in 2018 by entrepreneurs Yannis Niebelschuetz and Matti Niebelschuetz, CoachHub is a talent development platform that enables organisations to create a personalised, measurable and scalable coaching program for the entire workforce, regardless of department and seniority level. By doing so, both organisations and their employees are able to reap a multitude of benefits, including increased engagement, higher levels of productivity, improved job performance, acquisition of new soft and hard skills, a stronger sense of purpose and alignment with company values, improved retention and more meaningful relationships with colleagues, managers and customers.

How CoachHub works

CoachHub uses artificial intelligence to match employees to the right coach, after which they define goals and achieve them over time in co-creation. Progress is measured based on defined milestones and outcomes in the specific topics that are worked on. Coach and coachee meet via video calls, which are integrated into the mobile and desktop platform. With its practical and easy to use interface, and its economical solution to scalable coaching, CoachHub allows a wide group of participants to grow, using the most innovative and powerful professional development tool.

Statistics

- **1000+** CoachHub qualified coaches
- **96%** of coachees report having progressed on their goals
- **4.92/5** average session rating

Trusted by SMBs and Global Organisations
